The use of QR codes is accelerating. A quick scan with a smartphone and you can get a burst of information or complete an action... including making a payment! Sycurio.Digital payment links can be seamlessly embedded in QR codes, providing a powerful and flexible payment solution - customers simply scan with their phone and pay securely in seconds!

Whether you're mailing your customers a bill or taking face-to-face payments at busy events, QR code payments streamline the process so your customers can pay quickly, easily, and on their own terms.

Global spending through QR code payments is predicted to reach **more than \$3 trillion USD by 2025.**

Secure, fast QR code payment solutions for printed material and live events.

Statements, quotes, invoices, and bills

Exhibitions and conferences

Pop-up retail locations

Concerts

Sporting events

Give your customers the power of choice with QR code payments.

Reach every customer, everywhere. Unlock the convenience of QR code payments with Sycurio.Digital

- **Seamless CX:** Your customers can make payments conveniently by simply scanning a QR code - creating effortless payment experiences, reducing friction, and improving customer satisfaction
- **Configurable payment links to fit your needs:** Easily set up payment links to expire after a designated number of clicks, by time-specific or geolocation-specific parameters. Allow password protected links to become inactive after successful payment, and more
- **Instant payment confirmation:** With status updates in real time, customers can receive immediate payment notifications or receipts at checkout and also sent to them via email/SMS
- **Faster payments, happier customers:** In high-volume face-to-face transactions at live events like concerts or sporting events, QR code payment links can be significantly faster than traditional POS transactions by streamlining the process through instant smartphone scans and digital wallet integration

Sycurio.

4 simple steps to use Sycurio.Digital with QR codes.

1

Create payment links via our robust API or by using our plug-and-play UI that can be deployed within hours

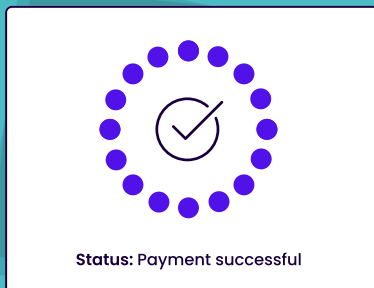

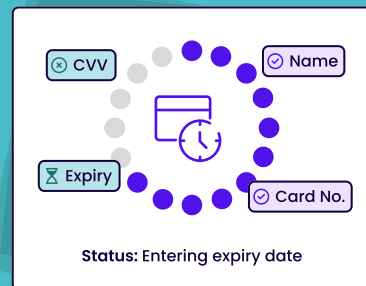

Embed the link into your QR code infrastructure and add the QR code to your desired medium, either print or digital

2

3

The customer scans the QR code with their smartphone, follows the link to your Sycurio payment capture page, and makes their payment on their phone using a card, digital payment wallet, or instant bank transfer. Your agents have live visibility throughout every stage of each transaction

We confirm the transaction has been completed and send the confirmations. Easy, fast, and flexible

4

Create secure payment links at live events and in printed communications with QR codes

- Ideal for statements, quotes, invoices and bills
- A seamless solution for exhibitions, pop-up retail, concerts, and sporting events
- Improves your payment CX by reducing friction and increasing customer satisfaction
- Delivers secure and compliant payments; descope your organization from PCI DSS requirements without complex security management and audits
